TECHNICAL SKILLS

Languages (used in projects)

Python · C++ · JavaScript ·
Verilog

Languages (basic)

C · Java

Hardware

RISC-V, Digital Logic,
Embedded Systems

Tools

Git · GitHub · Linux · VS Code

Areas

Generative AI, Graph Theory,
IoT

LANGUAGES

Portuguese	Native
English	Advanced (C1)
Spanish	Intermediate

Professional Summary

4th-semester Computer Science student at PUC Minas (expected graduation: 2028/2), interested in cybersecurity, AI, and computer architecture. Undergraduate researcher in Generative AI applied to conceptual modeling, author of a RISC-V processor in Verilog, and teaching assistant for Computer Architecture II. Seeking a remote or hybrid internship.

Experience

Undergraduate Research Assistant May 2026 – present
PUC Minas

Research on Generative AI applied to conceptual modeling with a human in the loop (Human-in-the-Loop). Focus on Data Science, Graph Theory, and Modeling.

Teaching Assistant, Computer Architecture II [period]
PUC Minas

Support for students in computer architecture topics such as digital logic and processors.

Projects

RV32I Monocycle Processor

Implemented a single-cycle RISC-V processor in Verilog covering every instruction of the RV32I base ISA, following the official specification.

Verilog RV32I

Awards

Top 10 — PUC Minas Hackathon (2026)

Best Interdisciplinary Project — Front-End (2025)

Finalist, Interdisciplinary Project — Back-End (2025)

Education

B.Sc. in Computer Science

2025 – 2028/2 (expected)

PUC Minas

Top grades (0–100 scale): Calculus II (91) · Computer Architecture II (90) · Intro to Programming Lab (89) · Computer Architecture I (83) · Intro to Computing (83).
